4.1 PART 1 Functional requirement optimization

Product Manager Name:KEYU LIU

ID:1403714

Intro: As part of the initial functionality optimization for the visually impaired reading robot, this feature enhancement focuses on integrating a music playback function. This addition aims to alleviate reading fatigue by allowing users to enjoy background music while reading, with adjustable playback speed to accommodate personal preferences. By iterating on the primary functional requirements, this improvement enhances the user experience, making extended reading sessions more comfortable and engaging.

Epic	As a [role]	I want [feature]	so that [benefit]	Link	Priority
Enhanced music playback for fatigue relief during reading	visually impaired user	to listen to music with adjustable playback speed	I can relieve fatigue during reading sessions and have a more enjoyable experience	4.1A	HIGH
Enhanced music playback and pause functionality for improved reading experience	visually impaired user	to listen to music, adjust playback speed, and pause reading anytime	I can relieve fatigue during reading and control the reading pace according to my needs	4.2B	HIGH
